

LED TUBE LIGHT - T5 Type A Glass

[Ballast Compatible]

Features

Compatible with mainstream market F54T5/HO ballast, LED tubes generate no UV or radiation and contain no mercury or toxic materials. LED tubes are rated at 50,000 hour of usage, four times traditional tubes, saving replacement costs or labor. An internal electronic ballast generates no annoying hum or buzz. LED Tubes generate uniform true light for the full life of the tube and almost no heat.
